

Frequently Asked Questions

Does Quick Click Design create customized Fan Pages?

- *No, not at this time. You will need to select one of our existing templates; colors, text and actual images may be edited to match your brand identity.*

Do I have to host with you forever?

- *No, but the first three years are included with your purchase. After the third year you may take the HTML code for your images and host them yourself; you are provided both high-res files so you may opt to host these on your own. *Be sure you have working knowledge of HTML in order for your pages to work properly on Facebook.*

Do you watermark your HTML templates with the Quick Click Design logo?

- *No. We want this to showcase your talent, not ours. It's all about your brand!*

What if I am not satisfied with my final template after my 3 edits allocated by Quick Click Design?

- *In the event you need more edits, an additional 3 edits may be purchased for \$20.*

What do I do with the High Resolution JPG images of my template?

- *These files are provided to you so you can pull them into Photoshop and create a new or modify a current Facebook profile image. These files will also allow you to host your images in the future on your own.*

Can I just purchase the template, without hosting?

- *No. Each template is the intellectual property of Quick Click Design and all templates are copyrighted by QCD.*

Can I make future edits to my template design?

- *No. After your purchase, any future edits would be considered a new purchase. Please remember, these are HTML files and changing images, links and colors will all impact the original code provided by QCD.*

Have more/additional questions for us? Please send your email to QuickClickDesign@gmail.com and we will be happy to find you an answer!
